Hello,

The following submission has been created.

Track Name: AIC2026

Paper ID: 2463

Paper Title: AI-Native Development Platforms and Traditional IDEs: Impact of Agentic AI on Software Engineering

Abstract:

This study evaluates three software development workflows – manual coding (W1), AI-assisted via GitHub Copilot (W2), and fully agentic via Claude (W3) – across two benchmark projects (a Todo List app and an E-Commerce site), yielding six measured experimental runs on identical hardware. Compared to the manual baseline, the agentic workflow reduced time-to-MVP by 64%, accelerated setup by over 200%, and cut debugging rounds by 58%, while bug density dropped 88% (from 2.0 to 0.25 defects per 100 LOC). Verification overhead rose to 35–40% of total workflow time, driven largely by environment-level issues rather than code failures – a finding backed by CLI logs and agentic trace data. The primary contribution is a controlled, head-to-head comparison of all three workflows on identical projects with objective trace evidence, alongside the Hybrid Orchestration Framework (HOF), which defines the roles developers take on when working with agentic AI systems.

- manmeetsingh7126@gmail.com (Primary)

Primary Subject Area: Computational intelligence

Secondary Subject Areas:

Intelligent Systems (Hardware & Software)

Submission Files:

Team_2_AI-Native Development Platforms and Traditional IDEs- Impact of Agentic AI on Software Engineering.pdf (352 Kb, Thu, 23 Apr 2026 11:28:54 GMT)

Submission Questions Response:

1. Conflict of Interest
Agreement accepted
2. Status of using third-party material in your article.
I am not using third-party material for which formal permission is required
3. Certificate of originality
Agreement accepted
4. Corresponding Author's Contact number
7696031906
5. Country Name
India
6. Authors Contributions
study conception and design: Author_1, Author_2; data collection: Author_1;
analysis and interpretation of results: Author_1,
7. Conference Rules and Guidelines
Agreement accepted

Thanks,

CMT team.
